

Synthesis Sancote 610

The versatile high performer

Durable and resilient

Coated PVC for just about anything

Banners and signs, temporary tents and marquees, awnings, medium duty tarpaulins and general covers are just some of the applications of this versatile material.

Synthesis Sancote 610 is Bio-Pruf treated to inhibit bacterial growth, preventing the appearance of mildew. Sancote's versatility is enhanced by having one side acrylic lacquered to resist soiling and the reverse unlaquered to reduce slipperiness.

For tenting and other applications that demand a gloss finish on both sides, Sancote 610 2L, in white only, offers an acrylic lacquer on the underside of the fabric to reduce soiling and improve longevity.

Manufactured to international quality standards, with a flame retardant additive, Sancote 610 meets specific Australian flammability standards for banners, tenting, matting, tarpaulins and awnings.

Flex crack resistant, Sancote 610 has a UV-stabilised coating which not only ensures durability, even under harsh sunlight, but also forms an excellent substrate for ink or paint coatings.

Santex 610 2L is only available in White

Base material:	Plain woven Polyester
Coating:	UV-stabilised PVC
Finish:	Gloss lacquer on top side only
Finish - 2L:	Gloss lacquer on both sides
Mass:	610 gsm (18 oz/sq yd)
Roll width:	2.05 m (6'9")
Roll length:	50 m (54½ yds)
