

Synthesis Santex

Covering all the options

Three variants for optimum choice

For signs and covers everywhere

Synthesis Santex is a light to medium duty fabric suitable for banners, awnings and a wide range of covers.

Made from a warp knit Polyester fabric for flatness and low profile, Santex has a UV-stabilised coating which offers very good adhesion and a flame retardant additive that meets Australian flammability standards.

Further, Santex is Bio Purf treated to inhibit the growth of bacteria and has excellent resistance to flex-cracking making it an economical choice for signage or coverage.

Santex is available in three variants designed for a wide range of applications. Each is manufactured to international quality standards and combines a winning range of features to offer excellent physical properties and performance.

Santex 460 is a light to medium duty fabric featuring a unique semi-gloss lacquer to reduce shine and slipperiness while maintaining protection.

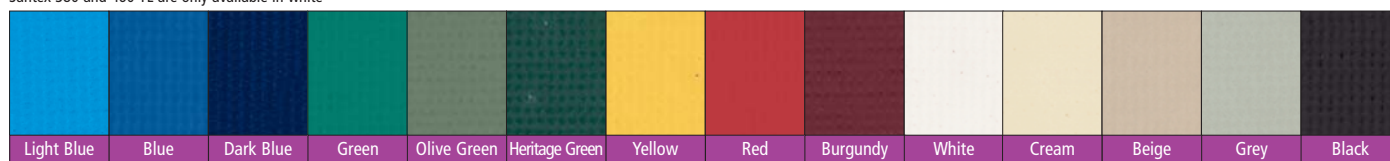

Santex 460 1L comes with a full-gloss lacquer on the top side for maximum protection and resistance to soiling.

Finally, Santax 380 is a lighter duty variant with a semi-gloss lacquer to reduce slipperiness and improve longevity.

	Santex 380
