

Synthesis **Multiblock**

Multiple layers for multiple benefits

Control the light

Blackout fabric for livestock shelters

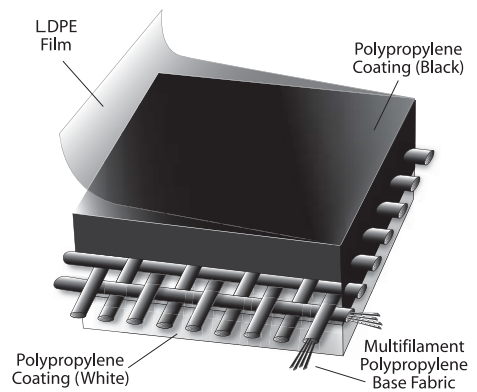

Synthesis Multiblock is a specially designed multi-layer fabric that facilitates controlled light reduction in critical applications such as poultry and livestock shelters.

Multiblock offers outstanding performance. The fabric features a high tenacity Polypropylene multifilament base fabric which is laminated and coated using Synthesis Advanced Coating Technology™.

The special film laminate on the top layer stops light transmission, and the proprietary UV-stabilised Polypropylene blend coating on the multifilament scrim offers superior dirt resistance and ensures a long service life. Multiblock's multi-layer coating also makes the fabric waterproof.

Additionally, Multiblock offers very good weld strength and remains flexible and pliable over time in all environments.

Base material:	UV-stabilised multifilament Polypropylene
Coating:	UV-stabilised Polypropylene blend
Mass:	425 gsm (12 ½ oz/sq yd)
Roll width:	2.05 m (6'9")
Roll lengths:	50 m (54 ½ yds) and Jumbo*
Warranty:	3 year UV**

*Jumbo rolls are lengths between 1200 to 1400 m (1312 – 1531 yds)

** Conditions apply. Please refer to the Product Warranty and Limitation of Liability statement for full details.
