

Synthesis **Landmark**

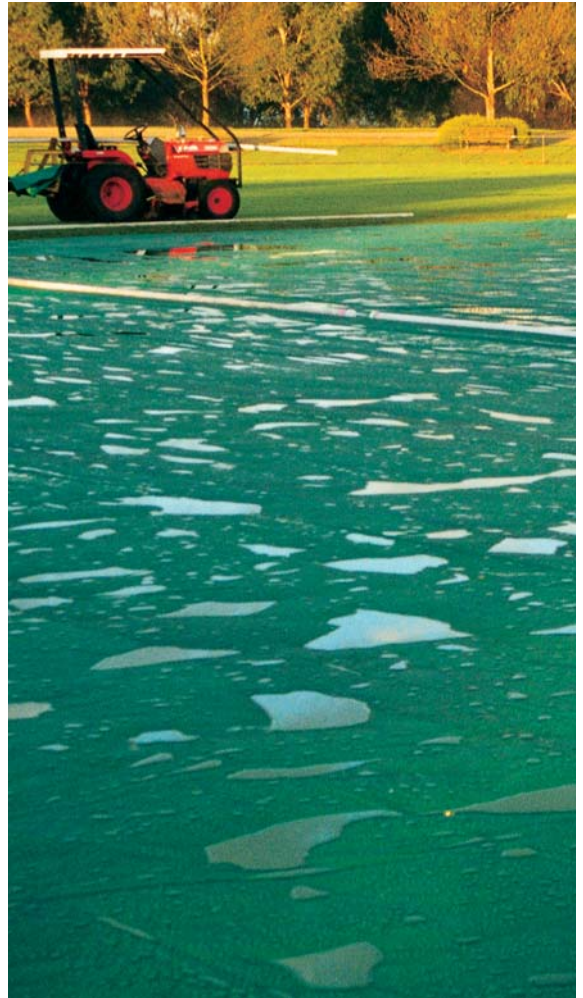

The revolutionary alternative
to PVC

Performs and protects

For covers, liners, tarpaulins, membranes and more

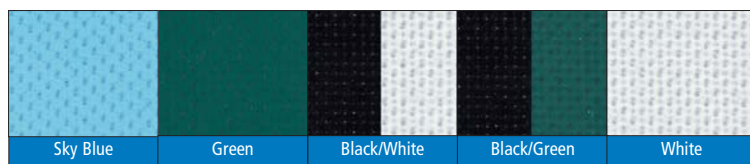

Synthesis Landmark is an advanced polypropylene fabric designed for heavy duty industrial and agricultural tarpaulins, covers, liners and membranes. Landmark is lighter and easier to handle than other similar strength PVC coated fabrics. UV stabilised coating and UV stabilised multifilament scrim give Landmark outstanding weather resistance.

The specially formulated coating, employing Synthesis Advance Coating Technology™, will maintain its flexibility for the lifetime of the fabric. It does not rely on migrating plasticisers such as those used in PVC coated fabrics. The coating has also been formulated to provide excellent dirt repellent properties.

The unique composition of Landmark makes it an environmentally friendly alternative to PVC coated fabrics. With a polypropylene scrim and coating, Landmark is recyclable.

Landmark is available in a range of practical colours. For additional resistance against tearing, choose Landmark TS which incorporates a tear stop weave pattern (available only in white).

Base material:	UV-stabilised Polypropylene
Coating:	UV-stabilised Polypropylene
Finish:	Natural
Mass:	340 gsm (10 oz/sq yd)
Roll width:	2.05 m (6' 9")
Roll lengths:	50 m (54½ yds) and Jumbo*
Warranty:	3 year UV**

*Jumbo rolls are lengths between 1000 and 1400 m (1094 – 1531 yds)

**Conditions apply. Please refer to the Product Warranty and Limitation of Liability statement for full details.
